GreenFolders Release Notes Version 2.2.2

What's New in GreenFolders 2.2.2

The following defects have been fixed

- 830: Date Sorting doesn't take into account the year
- 832: Cannot Enable/Disable audit types
- 834: Unable to share custom annotations
- 835: Cannot connect to Advantage Database

The following enhancements have been added:

- 117: Exporting of application settings into a template file
- 117: Creating new applications from a template
- 117: Enhanced startup wizard to allow users to create an application immediately after activation

Known Issues

- Attachment content not found on client machine Exception
- Bug that allowed a user to draw on another users annotation layer
- Changing displayed user name causes assignments to be lost
- Custom Annotations - Stamps - group annotations default to selection tool
- Disable network adapter makes program become inactive
- Exception thrown when closing a file
- Exception thrown when saving records
- Exception thrown when trying to rotate a tiff file
- Exception when adding files into Encore
- Exception when opening file using native program
- Exception when sorting
- New server installation sometimes fails to connect to DB
- Out of memory error when saving a record
- Out of memory exception when closing a file
- When copying a page from an attachment, with annotations on that page from multiple users, to an existing attachment you get an error

Important Note: Before upgrading to 2.2.2, please back up your current database
