GreenFolders Release Notes

Version 2.4.3

1. What's New in GreenFolders 2.4.3

The following defects have been fixed

- 769: Exception thrown when trying to rotate a tiff file
- 778: User updating its own display name will cause assignments to be lost until next login.
- 806: Exception thrown when saving records
- 831: Attachment content not found on client machine Exception
- 836: If network adapter is deactivated, GreenFolders must be reactivated
- 840: Exception when copying attachment
- 843: Exception thrown when copying attachment
- 845: Exception when emailing attachments
- 847: Error requesting evaluation key on activation screen
- 849: Cannot Create Folder with "&" in name
- 851: '&' on configure field layout
- 978: Keep loading folder if field fails
- 999: Exception viewing copied attachment
- 1010: Encore Folder still dirty after saving
- 1027: Not Localized exception on import fields screen
- 1037: Exception thrown when trying to open an attachment
- 1054: Freezing Folder, update folder on client
- 1058: Uncheck Remember Me causes password box to be cleared
- 1063: Classic Theme Ruins all data grid headers
- 1066: Color Picker should set the color when the hex string is edited.
- 1082: error copying attachment to a new attachment
- 1084: New Field screen tab order
- 1086: Annotations on PDF's move after 4x zoom

- 1087: If you zoom in on an attachment, annotations do not zoom in as well
- 1088: Email templates screen does not load data when first opened
- 1091: Column "Folder Type" on the Home Screen shows the Folder Type Name not the Folder Type Display Name
- 1098: Error Refreshing attachment information
- 1104: Combo boxes require data, even if the required box isn't checked.
- 1105: Edit attachment screen - label selection isn't consistent with rest of program
- 1112: attachment name can be blank
- 1113: Removing and re-adding a label and then removing again will cause exception to be thrown the next time you re-add the label
- 1115: Add the ability to pull fields with the same name, or same field twice
- 1118: field layout, default grid on
- 1127: Printing and Sharing annotations causes annotation layer to not be saved
- 1139: Cannot edit an existing GreenFolders database
- 1145: Database Store, File Store and Storage Plan still use Encore in the name and description of new databases
- 1146: Choose Attachment Screen - problem selecting certain attachments
- 1161: Copying attachment to different folder is case sensitive
- 1174: error buring annotations while saving to disk or emailing
- 1178: Advanced search returning multiple results but all results are the same folder
- 1191: Object null error when dragging attachments into GF from Outlook

2. The following enhancements have been added:

- 917: Save as button on saved searches
- 922: Tab Order on Configure Field Layout
- 935: Add the ability to copy a file to your inbox.
- 938: Add the ability to send user notifications out as SMS text
- 946: Add ability for greenFolders Service Installer to allow Windows Authentication

- 989: Add ability to hide a control/field on field layout screen
- 995: Better error message when activating a system with an invalid key or inactive key
- 1021: Create Closing Site Plug-in
- 1036: Allow users to move a field to another form in configure field layout and dragging functionality
- 1065: add a waiting spinner for the save button on the import fields screen
- 1074: show the size of the attachment on the attachment properties window
- 1080: Need to change client installer to work on x64 bit machines
- 1092: Ask user if they would like to create record when attempting to open a record that doesn't exist
- 1097: change folder/task state to Status
- 1107: Drag email message from outlook into GF
- 1108: Create ability for admins to see different date ranges of audit logs
- 1117: Add new Save and Close button on configure field layout
- 1119: Allow # as a special character in the field name and column names
- 1138: Add ability to create database stores with Windows Authentication (GUI)
- 1200: Attachment cannot be rendered when added using XML action script and the file name contains a period

3. Known Issues

- Bug that allowed a user to draw on another users annotation layer
- New server installation sometimes fails to connect to DB
- Out of memory exception when rotating image
- AnnotateViewer drag move exceptions
- Received the following error while attempting to login: Cannot access the ClientProxy on the Server.
- Field names on field creation screen do not have underscores
- Every time I select share attachment - save to disk - it moves up a directory
- Make it easier to have a decimal in a INT field....

- Received the following exception when pervasive ran out of user licenses
- Error compression annotation
- Sql Injection on advanced searching
- Tab control loses selection functionality when copy to
- Error closing out of greenfolders
- Searching bug with external folder types
- Sorting on all History Views is one-way only
- field layout automatic tab switch
- New folder for external database has error
- Printing in PDF problem
- Foxit Print Driver and printing labels from FedEx
- Error clicking on an attachment without an extension
- On my settings when you click on a theme it jumps you back to the general tab
- Custom Annotations - Stamps - group annotations default to selection tool
- Error moving through the create new database store wizard

Important Note: Before upgrading to 2.4, please back up your current database
