- 1177: Default value doesn't work on legacy folder for the combo box field type
- 1178: Advanced search returning multiple results but all results are the same folder
- 1187: Simplifile plugin does not open the website page, gets java error
- 1188: After upgrading to 2.4 some folder are no longer accessible through quick search or advanced search
- 1189: Freezing new attachments doesn't show an audit log that it was frozen
- 1190: External Database Column screen's list's radio buttons aren't themed
- 1191: Object null error when dragging attachments into GF from Outlook
- 1197: Remove Triggers
- 1199: Exception recording documents with Simplifile, retrieving audit types is not allowed
- 1210: Assigned To Notifications sometimes display wrong FolderName
- 1214: Unable to drag more than 1 attachment from outlook using Office 2007
- 1217: Plugins are not loading at all on x64 server
- 1218: Error locking file message shows invalid folder number in message
- 1223: Downloading packages from Simplifile into GreenFolders only takes the 1st file
- 1224: Folder Forms cannot contain '&'
- 1229: Unlocking locked user does not correctly display that the user is unlocked
- 1233: Exception thrown when trying to call show dialog on a non hidden window
- 1236: Server config app doesnt connect to database using windows authentication
- 1240: Folder action xml logic is always requiring user input when all values sent in are valid
- 1241: Object null error when printing when no fields are defined
- 1242: Send document type to Simplifile when uploading folders
- 1255: Saved Search...cant delete first criteria option when first enter screen
- 1256: Freezing an attachment only has 1 audit log when updating
- 1264: Null Reference exception when clicking the print button
- 1265: Application/folder type labels not localized on folder view
- 1267: Adding attachments through command line hard codes a .pdf to the end
- 1268: When adding attachments into GreenFolders the dialog does not appear in the task bar

- 1280: New Application Wizard allows users to choose "Select One"
- 1282: Administrators group description has a lower case "s" for System.
- 1285: Priority Color on tasks screen is overridden by highlight selection color
- 1289: Available fields have black labels on a dark gray background, also take up too much space with textboxes
- 1295: Remove labeledfolderindex tables from database
- 1296: Remove Advanced search security privilege
- 1305: Copying a field defaults to the wrong data type
- 1307: Exception when modifying theme colors
- 1313: Searching returns invalid results when searching off of more than 1 external field
- 1318: Task DueDates are local time, should be universal time
- 1322: Incomplete Task's CompletedDate shows 1899 on GUI
- 1325: Removing the current used theme causes exception
- 1328: Remove the username and password from your Simplifile config and attempt to save results in crash
- 1336: Save to disk attachment to disk problem, annotated pages are not in the correct order
- 1343: Removing a note from a folder updates the results value, but Adding does not
- 1345: Task Searching on CompletedDate
- 1351: Decimal fields cannot have a decimal value ending in 0
- 1355: Object null error after leaving the custom stamp screen and clicking on a
- 1369: strip invalid characters when sending files to Simplifile
- 1371: Saving files out of GreenFolders through sharing has a different file size than the original
- 1375: Default control height on field layout to 22 pixels instead of 26
- 1376: Add ability to change the textbox font size of a field on a form
- 1386: when adding files through the command line, and adding them straight into a folder, it appends pdf to the end

The following defects have been fixed in **2.5.0.1**

- 1394: When you close an editable window it closes the windows in GF too

The following defects have been fixed in **2.5.0.2**

- 1396: Field column name value only allows 25 characters, some external columns have up to 128
- 1397: Performing an advanced search using date times fails when using the between operator

The following defects have been fixed in **2.5.0.3**

- 1293: Adding attachments to a folder from the Inbox - attachments get lost
- 1448: Handling Unhandled Exceptions

The following defects have been fixed in **2.5.1**

- 1180: The embed image annotation tool always looks "clicked" after you click it once.
- 1181: GreenFolders crashed and would no longer allow user to log in (bad settings file)
- 1194: Invalid folder name, crashes app when closing the application normally
- 1228: When an attachment gets copied, all annotation layers are editable by the user who copied the attachment
- 1263: Labels should default to all when the label that is selected is no longer available
- 1283: Searching bug, Is One Of, Is Not One Of gives incorrect error message when using invalid data
- 1286: Able to make a folder locked and frozen on the GUI

- 1319: login fails if remember me is set and you modify the password text value
- 1326: Theme Buttons contain labels for name and will not include underscores
- 1337: Thumbnail control bugs
- 1339: Don't allow users to remove the last form (tab) when laying out fields
- 1352: Fields should inherit theme so that any user can layout the forms the same
- 1354: Renaming file stores and database stores removes them from the storage plan screen
- 1360: Printing: current attachment pages textbox tooltip problem
- 1364: Coping a folder that another user has deleted gives a null reference error
- 1365: Setting an attachment's thumbnail's flag to none removes the selected highlight color
- 1370: Copying a new folder with annotations give you an invalid revision error
- 1378: Database should check against deleting a locked folder
- 1379: Database needs to check against deleting a frozen folder
- 1398: Crash when loading a saved search with blank date/time values
- 1404: Exception message 10044 and 10074 are basically the same thing but provide two different messages
- 1407: Cannot Copy a folder twice after closing first copy in memory
- 1408: Copying a folder that is locked by someone else gives a cannot lock folder message
- 1409: user name cannot contain special characters, it is very common for a user name to contain a period
- 1411: when dragging a lot of fields onto a form in design mode it is extremely slow
- 1416: incorrect error received when creating a new group that has a circular reference
- 1417: Share Attachments - Annotations Drop down list- Not Localized
- 1420: server config connection type drop down shows checkboxes for each item on windows XP
- 1421: Object null error when creating a new folder type from a template file that has invalid data
- 1426: Audit logs are logged using folder name not folder display name, hard to find when using stream-line
- 1427: When creating an external folder by copying an existing folder it should check to see if it exists and give the same warning's as creating a folder
- 1428: Exception when renaming an external field while in classic theme mode

The following defects have been fixed in **2.5.1.1**

- 1440: Adding Fields on Configure Field Layout defaults text to transparent
- 1441: Streamline Sync, Transaction types can have names longer than 32 characters (folder types cannot)
- 1443: Field Display Names should be visible and editable from the Configure Field layout Screen
- 1445: Streamline data pull results in DBError in field names when Title only folders are created
- 1455: You can create the same folder twice with different capitalization when linked to streamline database
- 1458: Streamline: Opening folders with an incorrect folder type does not find the folder
- 1459: Remove legal descriptions fields from the streamline sync app
- 1463: Unable to add attachments to a folder from an HP scanner
- 1464: Streamline company contact phone numbers are showing up as the company's phone numbers instead of the contacts

The following defects have been fixed in **2.5.1.2**

- 1441: Streamline Sync, Transaction types can have names longer than 32 characters (folder types cannot)

The following defects have been fixed in **2.5.1.3**

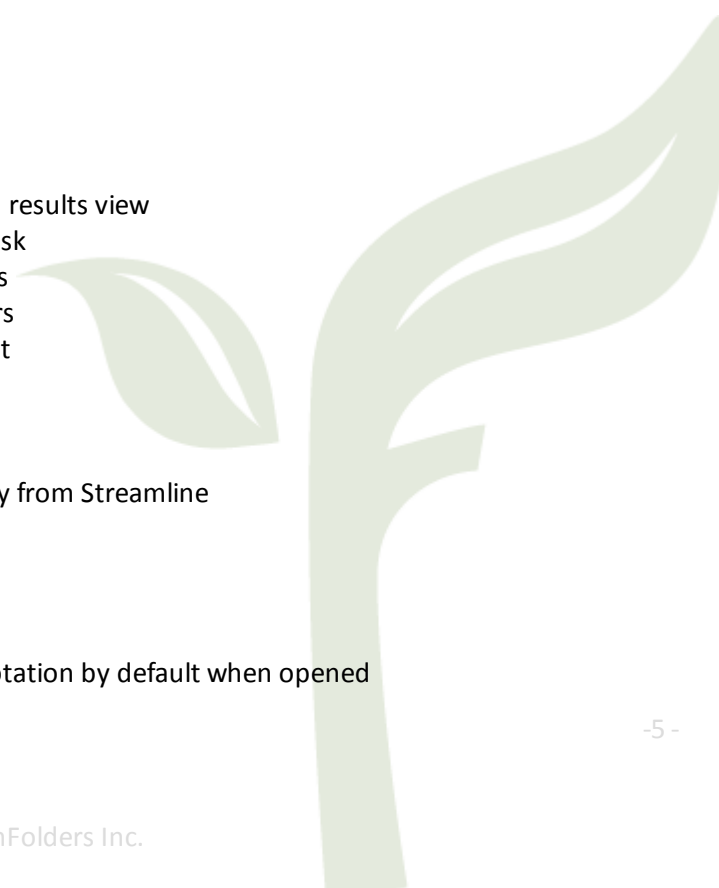

- 1316: Logging out when saved search is loading causes hard crash
- 1401: Empty LockedDates are 12/31/1753 5:00 PM, should be 1899 so they can be searched off of
- 1425: Dragging grouped highlighter annotations causes crash
- 1430: when in overdraft it is difficult to purchase the requested number of folders, the textbox doesn't allow certain numbers
- 1453: Cannot remove FolderType from any of the search results.
- 1454: Server Config settings should be saved before allowing user to press the start button
- 1460: Exception when moving a field from a tab to another tab by dragging it
- 1461: Server Config app testing new database install fails to connect because there isn't a GreenFolders database yet
- 1462: Email Notifications for tasks don't correctly display task name if upgraded from 2.2.2
- 1466: The send emails from textbox on the email settings screen grows as you add text
- 1467: Form tabs wrap on configure field layout but not on folder info screen
- 1470: Drag Drop attachment types breaks when windows DPI is 120 (large)
- 1471: Create a way for existing streamline customers to apply the default forms to their folder types when upgrading to 2.5.1.
- 1472: moving attachments to files that are open doesn't modify the file in memory
- 1473: Streamline: Escrow officer branch field pulling the title officer branch information
- 1474: Streamline: Escrow and title company fields are not pulling the correct company and contact information
- 1475: Streamline: Escrow Type field does not show any information

The following defects have been fixed in **2.5.1.4**

- 1499: Cannot delete an attachment from a folder, when you save it still exists
- 1500: Cannot create database store after syncing configuration from Streamline

**The following enhancements have been added:**

- 868: Add lock/freeze icon to the folder tab
- 912: Search off of attachment information
- 913: Advanced search for tasks
- 916: Add a button to clear out the recent records list
- 921: multi selection and updating in assignments/search results view
- 925: Unique states and priorities per record types and task
- 974: New folder dialog should remember the last settings
- 1032: Update Emageo references, change to Greenfolders
- 1033: Make Associating Fields Separate from Field Layout
- 1076: Automatic Updates for Client
- 1132: Auto refresh inbox
- 1140: Field layout enhancements
- 1149: Pull more external database information, especially from Streamline
- 1152: Allow users to define the location of the inbox
- 1153: Import/Export Custom annotations
- 1154: Change start menu chevrons to GF logo
- 1168: Add ability to copy a task on the GUI
- 1169: Custom annotation screen should select first annotation by default when opened

- 1170: Add ability to Assign All of a users folders to someone else
- 1196: Make enter key press activate button on Activate GreenFolders screen
- 1212: Make remote the default option selected on server configuration screen
- 1219: Add audit log for when folders are purchased, record the user who purchased the folders
- 1230: Move Fields to be defined per Folder Type
- 1232: Change installers to require 3.5 SP1
- 1234: Add ability to import/export a folder type
- 1239: Change database upgrade logic, make Greenfolders do it after installing new version
- 1247: Change attachment types to be folder type specific
- 1252: Give user feedback when dragging files into a folder that isn't locked
- 1254: Change labels to be folder type specific
- 1258: Remove default folder/tasks tabs from landing page
- 1259: Automatically create default saved searches when creating a new user
- 1260: Remove database scripts from installer
- 1261: Allow users to create new databases from scratch (on ServerConfigApp and GreenFolders GUI)
- 1262: Change all programs and projects to be built on top of the Dot Net 3.5 Framework
- 1294: Update server config app to stop/start the GreenFolders service
- 1298: When creating a new field Default to "Text" first instead of "Number"
- 1299: Show an attachment's compressed size if it is compressed
- 1302: Add new hyperlink control that can be used when displaying external field information
- 1303: Add preview button to configure field layout
- 1309: Upgrade Closing Site plugin configuration screen to define attachment types per folder type
- 1310: Email Settings password field shows the actual password
- 1320: Add a "Within the next" search criteria option
- 1340: Shared Stamps - add a warning message before deleted a custom stamp that is shared
- 1341: Show "creator" in custom stamp window
- 1382: Add Quick Search to add attachment screen Go button
- 1384: show a different color lock icon if you open a folder that is locked by someone else

The following enhancements have been fixed in **2.5.1**

- 878: Show annotations on image thumbnails
- 1149: Create new logic to pull more external database fields
- 1410: Change Streamline Sync to pull transaction types as folder types
- 1413: Retrieve attached list of fields from streamline database, change sync app to create folder types with these fields
- 1414: Streamline folders can have either a escrow number or a title number, this is per folder not per folder type
- 1415: Searching on Streamline date fields should allow users to use the calendar control

## 2. Currently Known Issues

- Out of memory exception when rotating image
- AnnotateViewer drag move exceptions
- Sql Injection on advanced searching
- Error compression annotation

- Tab control loses selection functionality when copy to
- field layout automatic tab switch
- Error closing out of GreenFolders
- On my settings when you click on a theme it jumps you back to the general tab
- If you change the extension of an attachment, the extension is only changed in memory not on the attachment that is in the temp folder
- Out of memory exception while manipulating attachments
- Greenfoldrs Error happened while saving a folder with an editable window open
- Exception when program had too many windows open?
- GreenFoldersdoes not print Field Information correctly to Adobe....
- Foxit print driver does not print embed email images?
- New folder says file does not exist in external data but links anyway
- When GreenFoldersopens a new window (preview window, open in new window) it should try to be more consistant...
- Out of memory exception when opening new windows
- Exception, cannot create a file when that file already exists
- Exception when retrieving attachment content
- When printing multiple files from stream line into GreenFolders, Mark for this error on a couple of files
- Application Templates with external data dont work
- Invalid XML characters for framework objects
- CDATA values for framework objects
- Create new DB localization problem
- Problem setting window owner, crashes
- Missing attachment content of copied folder
- bad Frozen and Locked folder problem
- Adding a document into a file which contains a frozen attachment, gets an error
- Date fields, the year 1899 or NULL?
- Changing encrypted or compressed attachments to another attachment type
- Exception refreshing a file
- An Error ocured while attempting to start the print process
- Form Tab loses selection when a field is selected
- Out of memory exception when saving a file to disk
- Object null error when saving a folder
- Folder is marked as an older revision while adding attachments to it from Add attachments screen
- User received folder revision is old even though it is locked by the user
- Foxit Print Driver and printing labels from FedEx
- Simplifile Out of Memory Exception
- Received the following exception when pervasive ran out of user licenses
- Error moving through the create new database store wizard
- GreenFolders crashes seemingly at random when sharing to email.
- Terminal Services Machine fails to launch GreenFolderswhen executable is ran
- Int fields that are rendered as checkboxes fail to save their values in the database
- When changing themes some styles do not update properly

**Important Note: Before upgrading to 2.5, please back up your current database**
