

Adding and Removing Columns

Just when you thought it couldn't get any easier!

Configure the GreenFolders home screen to show more information at a glance. The Home Screen has five standard Saved Searches. These searches or "Tabs" are; "Folders", which provide information about folders assigned to you, "Group Folders", folders assigned to your group/team, "Tasks", see all tasks assigned to you, "Group Tasks", see tasks assigned to your group/team and "Created Tasks" tasks that you have assigned to other users or Groups. Each of these Tabs has several default columns that provide basic folder or task information.

The screenshot shows the GreenFolders - 3.4.1 interface. At the top, there is a search bar with "Quick Search" and "Advanced Search" options. Below the search bar is a "Home" tab. The main content area has several tabs: "Folders", "Group Folders", "Tasks", "Group Tasks", "Created Tasks", "Notepad", and "Inbox". The "Folders" tab is selected, showing a table with the following columns: "Folder Name", "Folder Status", "Assigned Date", "Assigned To", "Folder Application", and "Folder Type Display". The table contains one row with the following data: "Folder 1", "New", "Date and Time", "Current User", "Your Application", and "Your Folder Type".

Folder Name	Folder Status	Assigned Date	Assigned To	Folder Application	Folder Type Display
Folder 1	New	Date and Time	Current User	Your Application	Your Folder Type

To change/customize which columns to display, follow the instructions below:

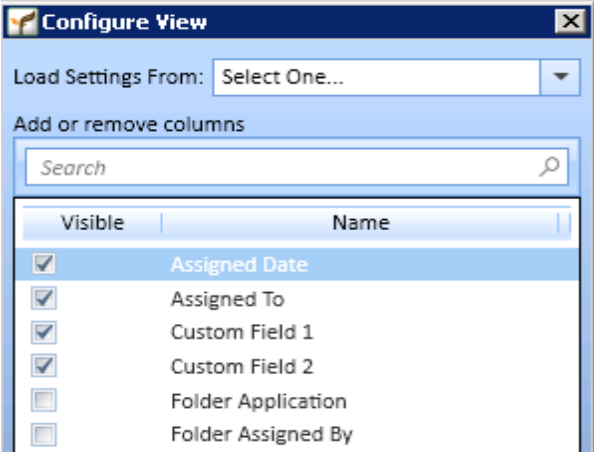

1. Select the tab that you would like to customize (Folders, Group Folders, Tasks, etc.)

2. Click the "Columns" button, located in the upper right hand area of the Home Screen.

- 3. In the “Configure View” window select the items you would like to show/remove as columns from the list, by placing/removing the checkmark in the box next to the item you would like to select or de-select, then click “OK”.

- 4. To change the order of the columns on the home screen, simply click on the Column Header and while holding the left mouse button, drag the column to the desired position and release the mouse button.
